## Technology

- > CodeIgniter
- > JavaScript
- > jQuery
- > AJAX
- > MySQL
- > Eclipse
- > SVN

## About the Project

iPledj had a vision to build a simple application enabling individuals to easily create personal pledges, engage others to rally around those causes, and measure how far the pledge and its support spreads across social media. The three step process to make or search pledge to join, share on social media & watch and support the pledge provides the simplest way to promote and engage crowd for noble causes.
